

How Do I Connect My Qolsys IQ Panel 2/2+ To Wi-Fi?

The Qolsys IQ Panel 2/2+ connects using both Wi-Fi and Cellular technology. This allows for two paths of communication. If the Wi-Fi network changes, you will need to change the settings in the Qolsys Panel. To change the Wi-Fi settings on a Qolsys IQ Panel 2/2+ follow these steps:

1. Access Wi-Fi settings. From the home screen, press the small grey bar at the top. Tap Settings then Tap Advanced Settings. Enter your master code. Tap Wi-Fi to get to the Wi-Fi menu.

2. Activate Wi-Fi. Make sure the Activate Wi-Fi box is checked

3. Choose your network. Select which network you want to connect to. Enter the password and Tap connect.

4. Exit the menu. Tap the house button at the bottom of the screen to get back to the home screen.
